

**The Planet Waves Speaker Connectors are a revolution in speaker wire termination. No stripping! No twisting! Connection via the gold-plated pin is direct to the connector.**

The connection pin inserts directly into the speaker wire, enabling 360 degree contact with the wire while it is within its jacket. The design virtually eliminates oxidation over time. The patented screw holds the wire securely in place and will not loosen.

Connectors are gold-plated, fully tested for superior signal transfer, and feature shallow depth.

Planet Waves Speaker Connectors are available in three versions and are engineered to terminate 12 AWG, 14 AWG, or 16 AWG wires according to SKU.

Color rings are sold separately.

**Product Specifications**

Available Gauges	12 AWG, 14 AWG, or 16 AWG
Contacts	Gold-plated
Finish	Chrome body
Color Rings Included	No

Part Numbers	Description	Gauge	Pack
12BSPKP50	12 AWG Speaker Connector	12 AWG	50 Pack
14BSPKP50	14 AWG Speaker Connector	14 AWG	50 Pack
16BSPKP50	16 AWG Speaker Connector	16 AWG	50 Pack
