

CYP & TDI INVITES YOU TO THE CYP
**PARTNER
DEVELOPMENT
DAY**

10AM-1PM WEDS 28TH SEPTEMBER 2022

Welcome to the CYP Partner Development Day!

With so many new technologies and products to introduce, we are cordially inviting you to join us at CYP's HQ in Shepperton so that we can give you an exclusive preview of the latest offerings from the ever-growing CYP product range. Featuring demonstrations and explanations from our experts, we will give you a fully guided tour of the latest iterations of the following technologies and product offerings:

1G AV over IP systems – The IP-7000 series allows installers to extend HDMI, VGA & audio signals along with USB KVM via a dedicated IT Network Infrastructure. Using the IP-CS7 Master Controller you are capable of simultaneously managing & configuring multiple IP extenders across the same network with ease.

10G AV over IP systems – CYPs' SDVoE CAT & Fibre Transceivers are able to transmit 4KHDR (6G) signals over a 10G IP Fiber & CAT Network with almost zero latency. Every Transceiver can be configured to function as either a Transmitter or a Receiver, providing additional flexibility for any installation. Using a sophisticated ultra-light compression (lossless for most content) it's the perfect solution for extending 4KHDR video and data.

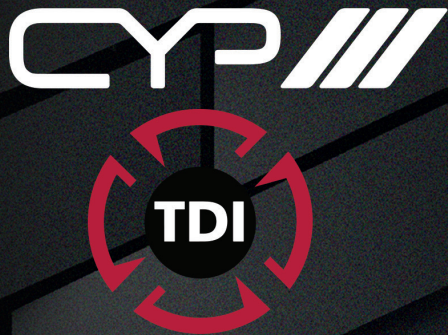

A NEW range of medical-related products – The new MED-VPR-8430 video recorder is dedicated design to integrate with multiple medical devices for video recording during surgical operations or diagnosis. It supports high quality video of 4K@60 video input and output to display over HDMI. The video from medical equipment such as endoscopes, X-Ray systems, ultrasonic devices, da Vinci Surgical Systems...etc. exports to monitors and is recorded to the built-in hard simultaneously.

The latest meeting room solutions – From our HDMI tabletop switching modules, to our Advanced 4K Multi-Format Presentation Switchers & finally to our new Wireless Presentation Systems (the Hyshare range); find out how CYP can impact your meeting rooms, classrooms & huddle spaces to create a flawless presentation experience.

In addition, we will also showcase how we have implemented the latest AV distribution technology, including HDBaseT3.0, AVX and Dante, whilst offering an insight in how to utilise our latest testing and analysis hardware.

All of our technical and sales team will be on hand to answer any questions throughout the day.

PTO for additional details.

CYP & TDI INVITES **YOU** TO THE CYP
**PARTNER
DEVELOPMENT
DAY**
